JUNE SPECIAL REPORT: THE POWER OF DETOX

Part 2

LIVE LONGER LIVE BETTER

A cleanse (detox) is the process of extracting, neutralizing, and eliminating built-up waste, pharmaceutical drug residue, heavy metals, mucous, pus, toxic chemicals, poisons or any harmful residues from your body. This waste can be in your fat, muscles, organs, cells, and even within the various spaces between organs within your body.

One of the greatest ways to prevent, and even heal disease, is to keep ahead of the game by periodically assisting our body in eliminating this built-up toxic waste. That's a detox.

The bottom line is that modern life and modern living have overloaded, overworked, polluted, irritated, inflamed, clogged, scarred, constipated, degenerated, and diseased all of your body's elimination organs and systems.

This has caused a slowing down effect of your body's elimination of toxic waste, and caused it to be backed up and deposited – (and even stored) in your body – overworking and depressing your immune system and lowering your disease resistance.

This unavoidable toxicity underscores the serious importance of regular and routine cleansing, detoxification, and toning of these precious elimination organs and systems.

DETOXING YOUR LIVER & GALLBLADDER

Your liver is your blood filter. Every second of every day it filters, traps, neutralizes, kills and eliminates poisons that you inhale, ingest and absorb. From common poisonous chemicals in the home, workplace or even on your dinner plate to prescription drug residues, air pollution and worn-out blood cells, there are literally millions of toxic trash bits circulating all over your body that your liver has to defend you against.

KIDNEYS & BLADDER

Every organ in your body **DEPENDS** on your kidneys staying clean, healthy and strong. Clogged and sluggish kidneys impact every system of the body, because your kidneys are such a key part of delivering essential vitamins and oxygen to your cells, along with getting the waste and toxins out.

Herbs are the safest and most powerful way to support your kidneys and urinary tract. They work mostly by increasing your flow of urine, which naturally flushes and cleans your urinary tract.

From the May Issue: Detoxing, Part 1

Your bowel is the **LARGEST** elimination organ in your body. It is the major way waste gets out of your body. A constipated, swollen bowel can put pressure on a nearby area, causing an almost endless list of ailments like abdominal discomfort, allergies, asthma, backaches, constipation, cramps, depression, fatigue,

food cravings, headaches, hemorrhoids, indigestion, insomnia, irritability, memory loss, menstrual problems, nausea, poor appetite, prostate trouble, skin problems, sexual dysfunction and weight gain. This is why the **FIRST STEP** in any health program is cleansing and detoxifying your bowel.

Your Liver

Flushing, cleansing and protecting your liver is one of the most important disease prevention programs you can ever do.

Your liver is the ultimate detoxification organ in your body. Everything that goes into your mouth must first pass through the liver (and its numerous safety checks) before entering your bloodstream to feed every cell in your body.

When your liver is clean and healthy, it can neutralize and render harmless all the harmful and toxic substances in your food, water and air.

Medical doctors often say that before most diseases develop, the liver was malfunctioning and not doing its job. Many oncologists (cancer specialists) say that long before a person develops cancer, almost always, the liver was weak and not protecting the patient. This is why the liver is referred to as your first line of defense. Your liver is your defensive barrier between the things you take into your body and your blood.

Your Kidneys

From getting more vitamins and oxygen to your brain, to faster immune response by maintaining healthy sugar levels in your blood, keeping your kidneys healthy is mandatory if you want to live longer and healthier.

Kidney impairment and dysfunction can be the cause behind an endless list of symptoms and ailments. Keeping your kidneys and bladder healthy helps every organ in your body to work better.

Your kidneys clean all the blood in your body every 60 minutes, regulate blood pressure, and are responsible for the assimilation of vitamins into your bloodstream. They regulate and control production of red blood cells, which carry oxygen to every cell in your body. And, your kidneys manage fluid levels, finding a balance between water retention and dehydration.

Because your kidneys are such a key part of delivering essential vitamins and oxygen to your cells, keeping them clean has a positive impact on every system of the body.

The Assault On Your Liver

CONTAMINATED WATER

Over 3 billion gallons of untreated sewage, industrial waste and toxic runoff are discharged into U.S. waters daily. Nearly 50% of our rivers and lakes are too polluted for fishing and swimming.

PCBs (used in paints, plastics, adhesives, and common furniture fabric protectors) are now found in groundwater worldwide. And, radioactive radon and radium are common.

POISONED FOOD

The FDA has warned there are over 50 different known poisons and toxic substances in the average American's grocery cart.

Every single day, hundreds of millions of pounds of chemicals are dumped on American soil, including chemical fertilizers, organophosphates (known to cause cancer) and toxic insecticides, pesticides and herbicides.

TOXIC AIR

A short list of toxins in the air you are breathing right now includes carbon monoxide, lead, ash, hydrocarbons, nitrogen dioxide, sulfur oxides, insecticides, herbicides, dust from fertilizers and pesticides, and acid rain vapors.

Chemicals in our indoor air may have concentrations of up to 100 times higher than outdoor air.

DEADLY DRUGS

An analysis of autopsies found the rate of deaths caused by prescription drugs was three times the rate caused by all illegal drugs combined.

The American Medical Association reports prescription drugs kill 106,000 Americans annually and injure another 2.2 million. Acute liver failure is the #1 cause of prescription drugs being pulled off the market.

and protects
your Liver

5-Day Liver Detox

If you are a human being who eats, drinks and breathes, and if you live anywhere on this planet, your liver has been attacked, damaged and maybe is even sick. Your only defense is a strong offense, in other words, a strong and healthy liver. And, the best way to maintain a strong and healthy liver is to cleanse it regularly.

My 5-Day LIVER Detox is not only safe and easy, but also extremely effective. The reason I know that this program works and is extremely effective is because I used it for over 20 years in my clinic with thousands of people. Many of them were told that they needed liver transplants and gallbladder removals, but instead they cleaned their liver and gallbladder out with this five-day program. I made every patient do my 5-Day LIVER Detox. Liver and gallbladder flushing is mandatory, not optional.

Defend yourself from everyday toxins—flush and protect your liver!

- COATS and PROTECTS your liver cells and helps to eliminate harmful, dangerous contaminants
- Helps to DISSOLVE and REMOVE hardened sediments from the gallbladder
- CLEANS your blood of unhealthy accumulated deposits
- A CLEAN liver means you have all the ENERGY you need when you need it

Kidney Facts

SUGAR & SODIUM

A can of Coke contains an adult male's recommended daily sugar intake (36 grams), and almost double what women should consume (20 grams).

And as for sodium, two slices of "Meat Lovers" pizza contain 2020mg; an adult's entire recommended daily intake. These are the culprits that overload our kidneys.

INCONTINENCE

Urinary incontinence is an involuntary leakage of urine, affecting over 25 million adults. It can be a distressing problem, and may have a profound impact on quality of life.

Over the past decade the number of Americans with kidney failure has doubled to more than 400,000 at a cost of \$25 billion annually. And over the past 20 years, sales of adult diapers have increased by 430%.

KIDNEY DISEASE

15 million Americans report kidney and bladder illness annually, about 9 million may have kidney disease.

Over 100,000 people, at a cost of about \$75,000 a year each, will be diagnosed with end stage renal disease (ESRD) and put on dialysis. After five years on dialysis, about 25% of patients are still living. After 10 years, less than 8%.

DIABETES

The CDC estimates as many as 1 in 3 Americans living today may be diabetic by 2050, and diabetes is the #1 cause of kidney disease. Over the past 50 years, diabetes has increased 600% In America, and it's reaching epidemic proportions.

Also growing, pre-diabetes; a condition that increases the risk of type 2 diabetes, heart disease and stroke.

A person is rock climbing a vertical rock face with prominent blue and white horizontal stripes. The climber is wearing a blue and yellow tank top, yellow pants, and a climbing harness. They are positioned on the right side of the frame, reaching up with their right arm. A green rope is visible running down the rock face. The background shows more of the rock face and some green foliage at the bottom left.

I'm so glad I did it.

"I did your full 30-DAY DETOX program before my husband and I got pregnant and I'm so glad I did. I have been a vegan for 17 years, so I didn't think the detox would be that big of a deal. It was incredible!! I felt like I could run across the country, I had so much energy. Love it!!!! The liver program was the hardest for me. My body really detoxed from that one. We got pregnant a few months after that and I am having a fantastic pregnancy. Feeling great. Thank you again for all you do."

I am feeling more alive than ever and getting healthy.

"I met a terrific woman who inspired me to become a raw-foodist and told me that I needed to cleanse my body. She brought me to your pharmacy and I purchased the 30-Day Detox Program. I have completed the Bowel Detox and the Liver Detox and have now started the Kidney Detox. In two months of eating raw foods and using your products, I am feeling more alive than ever, have lost 20 pounds and am in the process of getting healthy. I want to thank you for your products with their wonderful healing formulas that come from God's green earth."

“Your body is really no different than your car. Like any machine, if you want it to last and give you the maximum lifespan that it was designed for, and give you years and years of trouble-free service, then it needs routine maintenance!” – Dr. Schulze

We all know that if you want to get the most miles out of your vehicle, then you have to follow a routine preventative maintenance program, just like the one that comes inside the glove compartment of every new car. You know, change the oil and oil filter every 5,000 miles, rotate the tires, change the air filter every 10,000, a tune-up in 20,000 or 25,000 miles, radiator flush, check the battery and so on. Any mechanic will tell you that if you want your car to last for years and years, you need to take care of it.

What’s my bottom line? Start taking better care of your body than you do your car, not the other way around! If you want this beautiful, amazing body you’ve been given to last as long as possible, start giving it the best fuel possible and start routine maintenance and cleansing. This will keep your “machine” running at its best for years to come!
