MAY 2017 **SPECIAL REPORT**

Outer Beauty Starts With
Inner Beauty. **Detox Now.**

Outer Beauty Starts with **Inner Beauty**

I first opened my clinic in Hollywood, California in the 1970's and ended in Malibu, California in the 1990's. The only reason I'm telling you this is so you get the picture (pun intended) that my patients were myopically focused on LOOKING GREAT and also having tons of ENERGY.

My patients were print models for magazines and catalogs, actresses and actors, even stuntmen and women. And, they ALL came to me wanting more ENERGY, better looking SKIN, thick and shiny HAIR, and strong, fast-growing NAILS.

And they ALL walked out with DETOX Kits!

The biggest benefit of DETOXING your body is certainly increased health. Detoxing HEALS disease and PREVENTS disease, period. But, the amazing side effect of DETOXING INSIDE is LOOKING AWESOME OUTSIDE!

I wish I had a dollar for every person that has come up to me over the past 45 years and told me my skin looked great or they wished they had my energy. I look and feel great for two reasons: I get GREAT NUTRITION IN, and I get the BAD WASTE OUT (DETOXING)!

And, if there was only one Detox that had the biggest impact on how you looked, it is certainly my KIDNEY DETOX. In fact, I would always prescribe it for patients with bad skin problems.

Beyond that, I DON'T want you to become one of the 40 million Americans with kidney and

bladder infections and diseases. Or, one of the 25 million Americans using adult diapers due to incontinence. Or, one of the 100,000 newcomers to kidney and bladder disease just this year! Especially when a simple, seasonal 5-Day Detox could have reversed almost ALL of these nightmares...and still can! I want to make sure you don't become a disease statistic.

I truly hope that every single month, when I write these Special Reports, that I convince yet another group of Americans to abandon their sickly life of "managing" their diseases and being a pharmaceutical drug addict. Instead, I want you to create a new life of feeling great, having more fun, more health and living disease-free. I'll never give up. If I can save even one person each month, it's worth it to me.

Friends, there is nothing better than feeling awesome, having tons of energy, and laughing, loving, and being blissed-out, plus looking and feeling hot this summer! The information I give you in this month's Special Report can make this dream a reality.

Dr. Scholze

Flush & Feel Great!

In his clinic, Dr. Schulze discovered that, even though your kidneys are complex, keeping them healthy and doing their job efficiently is actually very simple... and, it's one of the most important things you can do for your health!

You see, every organ in your body—in fact, every one of your 100 trillion cells—have the same two basic functions: In and Out, In and Out, In and Out.

Assimilate nutrition IN; and eliminate waste OUT. And, when it comes to the OUT (the elimination of waste), your body only has two major ways to remove this waste. Your solid waste is removed by your bowel, and your liquid waste is removed by your kidneys and bladder.

So FLUSHING your Kidneys out with his Herbal Detox program once a year, just makes really good sense.

6 ESSENTIAL WAYS

Your Kidneys Are **Keeping You Alive** Right Now...

1) Your kidneys filter all of your blood every hour!

All of your blood passes through your kidneys every four minutes! Just like the oil filter in your car, once your kidneys get clogged, they can't do their job.

2) Your kidneys help regulate your blood pressure!

Nine out of 10 Americans will suffer from high blood pressure at some point in their lives.

3) Your kidneys are responsible for assimilating vitamins and nutrients!

Low blood sugar, headaches, fatigue, drowsiness, low energy—these are all linked to poor nutrient assimilation by your kidneys.

4) Your kidneys manage the production of red blood cells!

Your red blood cells carry oxygen to every cell in your body. If your kidneys are not working efficiently, your red blood cell count can waver drastically.

5) Your kidneys help to regulate all body fluids!

If you suffer from dehydration (too little water) or edema (too much water), your kidneys are definitely out of balance.

6) Your kidneys are the only organ that produces active Vitamin D for you!

Vitamin D promotes strong, healthy bones and reduces your risk of cardiovascular disease, hypertension and osteoporosis.

Top Reasons **EVERYONE** Needs To **Cleanse** Their **Kidneys!**

SUGAR & SODIUM OVERLOAD

There is way too much sugar and sodium in everyday foods. The top two culprits that overload and run down our kidneys are sodium and sugar. The prolonged result is Kidney Disease. One of the most popular “on the go” lunches in America is a slice of pizza and a Coke. But, did you know that just ONE 12-oz can of Coke contains an average 38 grams of SUGAR, more than an adult male’s entire recommended sugar intake for the day (36 grams), and is almost double what a woman should consume (20 grams)!

KIDNEY STONES

Painful, debilitating bouts with kidney stones are **skyrocketing in America**. More than 30 million people are expected to get a kidney stone—twice the amount of 30 years ago. Ten years ago, kidney stones occurred in approximately 5.2% of the U.S. population. Today, due to high-protein diets and increased stress, about 20% of men and 10% of women can now expect to suffer from a stone during his or her lifetime.

DIABETES

Over the past 50 years, **DIABETES** has increased **600% in America**, and it’s reaching epidemic proportions. 22 Million people worldwide now have Diabetes (more than the entire population of the United States). This is a 400% increase in the past 20 years due to one thing...excess weight! Diabetes lowers your life expectancy by an average of 12 years and increases your chance of suffering with depression by 94%!

INCONTINENCE

Over 25 Million American adults now suffer with **incontinence**. It is now estimated that over 1.7 Million American adults need diapers. Over the past 20 years, adult diaper sales have increased by 430% and become a \$1.7 Billion industry! Over the past decade, the number of Americans with kidney failure has doubled to more than 400,000 now being treated at a cost of \$25 Billion annually.

DIALYSIS

Each year, over 100,000 Americans are diagnosed with **End Stage Renal Disease (ESRD)** and put on dialysis. After five years on dialysis, only about 25% of patients are still living. After 10 years, less than 8% are still alive. Worse, more than 15 million Americans are expected to report some type of kidney and bladder illness this year, and 9 million of these cases will be potentially deadly, if no positive lifestyle changes are made.

BUILD STRONGER MUSCLES!

The main component of your muscles is Protein. Exercise breaks down muscle so it grows back stronger, which is why I say “Workout, Regenerate and STRENGTHEN!” Extra protein assures your workout builds you up.

INCREASE MUSCLE THICKNESS!

A myth about vegetable proteins is that they don’t have the same effect on muscle growth and recovery as dairy-based whey and casein proteins. However, study upon study has proven pea protein increased muscle thickness exactly the same, with none of the toxicity.

LOOK AND FEEL YOUNGER!

Adding more Protein to your diet builds more substances like Collagen, Elastin and Keratin. These proteins make your face look younger, smoother, less wrinkled, and also keep your muscles more elastic, helping you move your body with more ease. You’ll feel better and have less pain, whether you do heavy workouts or just walk. And, Keratin builds thick strong hair and strong nails.

BE HAPPIER!

Protein’s amino acids produce more neurotransmitters such as Serotonin and Dopamine. Serotonin is a positive cure for depression, and is the fuel our brain uses for our mood, sexual desire, sleep, memory and

social behavior. Dopamine helps control the brain’s reward and pleasure centers, and higher Dopamine levels in our brain are associated with more success in life!

FEEL FULL, BURN MORE FAT!

Finally, a great benefit to taking a Protein Supplement is that it lowers your levels of the hormone Ghrelin. This hormone in your stomach tells your brain you’re hungry and to eat more food. Protein, specifically Pea Protein, slows the release of the Ghrelin making your brain think you’re full longer. Protein also helps you become more efficient at burning excess fat.

BETTER PROTEIN

Superior to dairy and egg proteins, the Brown Rice, Green Pea and Spirulina / Chlorella Protein blend in SuperProtein Plus has a perfect and balanced blend of amino acids. Brown Rice protein is high in the sulfur-containing amino acids, Cysteine and Methionine, but low in Lysine. Green Pea protein, on the other hand, is high in Lysine, but low in Cysteine and Methionine. When you add the amazing super-amino acid, protein-rich Spirulina and Chlorella, the amino acid protein balance is not just comparable to dairy or egg proteins, it is even better! All this without the potential for allergies, gas or intestinal issues that some users have experienced with Whey, Casein and Soy Proteins.
